EdOptions High School Brings New Learning Model to the Valley

Prescott Valley, AZ, July 13, 2009 – The Educational Options Foundation, a Tempe, Ariz. nonprofit corporation, will open their first independent public high school this fall at a location in Tempe, Ariz., it was announced today.

EdOptions High School (EOHS)—a Next Generation independent public school—will provide high school students with a 21st-century approach to learning by merging highly qualified classroom teachers and an award-winning Web-based educational curriculum in a school setting. In addition to the classroom and learning labs, students can also access coursework 24/7 from any computer with an Internet connection.

“The tremendous success of our educational software program that lets students excel at their own pace and allows teachers to mentor more effectively made opening a ‘brick and mortar’ independent public school the logical next step,” Educational Options Foundation president and EdOptions™ CEO [Dr. Tom Sawner](http://www.edoptions.com/about/ceo.html) (<http://www.edoptions.com/about/ceo.html>) said. “EdOptions High School (<http://www.eohighschool.com/>) offers students the exceptional flexibility of four-hour school days with their choice of attending morning or afternoon sessions in the traditional atmosphere of a school rather than having to opt for an online-only school and work from home in isolation.”

Students will receive instructional guidance from certified teachers online, as well as face-to-face instruction and assistance by certified teachers in the classroom. Students can access Web-based coursework at any time allowing individuals to learn at their own pace, graduating ahead of schedule if they desire.

“We work with each student to set their own educational goals. EOHS offers its students the ability to work at their own speed, attending to their schoolwork both in the traditional school setting and from any location with an Internet-capable computer,” [Jim Taylor](http://www.eohighschool.com/academics_faculty.html) (http://www.eohighschool.com/academics_faculty.html), Principal of EdOptions High School said. “Using Web-based curriculum and instruction in combination with our classroom teachers, students are able to master subjects quickly and completely which gives them tremendous confidence and motivation.”

EOHS will have a maximum enrollment of 200 students; classes for the 2009/10 school year begin August 10. Visit www.eohighschool.com for more information or to enroll today.

About EdOptions High School

EdOptions High School (EOHS) is an independent public high school that is dedicated to providing students with a proven curriculum that aligns to state standards, scheduling flexibility, and an educational environment of high expectations and individual successes. EOHS uses a 21st century educational approach which merges technology and content delivery systems with highly qualified teachers in a classroom environment to create an educational synergy that provides all students with superior opportunities for success.

About Educational Options Foundation

The Educational Options Foundation (http://www.eohighschool.com/support_eofoundation.html), founded as a non-profit corporation in 2008, supports educational organizations promoting the lifelong endeavor of learning. The Foundation's activities center around two main themes: charter schools and educational grants. The Foundation is committed to providing Web-based curriculum through EdOptions, an award-winning education technology firm, to support both public and non-traditional educational institutions.
