

# Text Measurement Report

To respond to client inquiries regarding reading levels of our program, Educational Options provides Lexile measures for all of our courseware. The Lexile Framework® for Reading is a scientific approach to measuring a student's reading ability and the difficulty level of reading materials. As the most widely adopted reading measure in use today, Lexiles are found in the reading and testing programs of states, school districts, and the U.S. Department of Education's "America Reads" program.

Those states and individual school districts across the country that have already identified students' Lexile measures through their assessment process will be able to use the Lexile measures of reading difficulty for Stars Suite courses to individualize student instruction.

Schools that do not employ Lexile measures for student reading ability may want to learn more about this tool by visiting Lexile online at: [www.lexile.com](http://www.lexile.com)

Title	Lexile
